Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicants' Response to the Office's Restriction has been carefully reviewed but is held to have been proper. In view of this finding and further in view of Applicants' Response the Restriction is hereby **made Final**. Applicants are required to cancel all non-elected claims or in the alternative take other appropriate action.

An action on the merits of Claims 1-5 follows.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yanof et al (Pat No. 6,513,430; hereinafter '430)..

The '430 teaches a method of making a probe for testing semiconductor chips wherein passages are provided in a substrate, wherein electrically conducting material, e.g metal is provided the plurality of passages (Cf. 14 in Fig. 3). It is held to have obvious to provide that the substrate can be a thin film if indeed the substrate itself cannot be construed to be a thin film. Moreover a POSITA would provide that the passages in the substrate be such that they be arranged so that a pattern exists which corresponds to a pattern of external connections on a semiconductor device. Otherwise why make the testing probe. This is not to concede that the document itself fails to teach each and every limitation recite in Applicants' claimed invention (in claim 1). The claimed limitation in Applicants' claims 2-4 is clearly seen in at least Figure 3 of the '430 while the limitation in claim 5 also be can be in Figure 3 of the '430.
